

Quantum Monte Carlo in the Apuan Alps VII

International Workshop
Saturday 28th July - Saturday 4th August 2012
The Apuan Alps Centre for Physics @ TTI, Vallico Sotto, Tuscany

www.vallico.net/tti/tti.html

This is the programme document for the 2012 international workshop *Quantum Monte Carlo in the Apuan Alps* - the seventh such event to be held on this topic at TTI. The general purpose of workshops at this venue is to gather together limited numbers of expert physicists to discuss topics of mutual interest in greater depth than is normally possible. The focus of this meeting will be on the quantum Monte Carlo (QMC) method and other related techniques in computational electronic structure theory, and their use in understanding the quantum-mechanical behaviour of atoms, molecules, and various kinds of condensed matter.

For many types of problem the accuracy of quantum Monte Carlo is much better than that of the more widely-used density functional theory, and its scaling with number of atoms is much more favourable than that of high-level quantum chemistry. Unlike most other methods, it is also fully capable of exploiting the full power of the largest computers in the world (e.g. the Cambridge CASINO code has been shown to have almost perfect parallel scaling to over 130,000 CPU cores). All topics related to applications of QMC and/or theory and algorithm development will be welcome, though it is expected that broader topics in the general area will also be discussed.

The format of TTI workshops is intended to encourage a relaxed and intellectually-stimulating atmosphere rather different to the usual 8am to 7pm grind of your regular conference. Formal talks are restricted to the mornings, and participants are given the freedom and space to think and to contemplate and discuss the issues at hand. Healthy recreational activities such as mountain walks are to be organized in the afternoons, and it is hoped that by taking part in these whilst breathing the clean air of the Apuan Alps and sampling local Tuscan food, the participant will be able to return home mentally and physically refreshed as well as having deepened their understanding of science.

1 LIST OF REGISTERED PARTICIPANTS

Dario Alfè	UCL, London, U.K.	d.alfè at ucl.ac.uk
Sam Azadi	Imperial College, London, U.K.	s.azadi at imperial.ac.uk
Stefano Baroni	SISSA, Trieste, Italy	baroni at sissa.it
Benoît Braida	University of Paris, France	braida at lct.jussieu.fr
Dario Bressanini	Università dell'Insubria, Italy	dario.bressanini at uninsubria.it
Pascal Bugnion	University of Cambridge, U.K.	pob24 at cam.ac.uk
Mauro Causà	University of Napoli, Italy	mauro.causa at unina.it
Dominik Domin	University of Ulm, Germany	domindominik at gmail.com
Andrea Droghetti	Trinity College, Dublin, Ireland	drogheta at tcd.ie
Neil Drummond	Lancaster University, U.K.	n.drummond at lancaster.ac.uk
Matthew Foulkes	Imperial College, London, U.K.	wmc.foulkes at imperial.ac.uk
Mike Gillan	University College, London, U.K.	m.gillan at ucl.ac.uk
Kenta Hongo	JAIST, Japan	kenta_hongo at mac.com
Martin Korth	University of Ulm, Germany	martin.korth at uni-ulm.de
Pablo López Ríos	Cambridge University, U.K.	pl275 at cam.ac.uk
Ryo Maezono	JAIST, Japan	rmaezono at mac.com
Mariapia Marchi	ESTECO S.p.A., Trieste, Italy	marchi at esteco.com
Alston Misquitta	Queen Mary University, U.K.	am592 at cam.ac.uk
Bartomeu Monserrat-Sanchez	University of Cambridge, U.K.	bm418 at cam.ac.uk
Saverio Moroni	INFN, Trieste, Italy	saveriomoroni at gmail.com
Richard Needs	Cambridge University, U.K.	rn11 at cam.ac.uk
Catherine Overy	Cambridge University, U.K.	cmo30 at cam.ac.uk
Kevin Schmidt (TBC)	Arizona State University, USA	kevin.schmidt at asu.edu
James Shepherd	Cambridge University, U.K.	js615 at cam.ac.uk
James Spencer	Imperial College, U.K.	j.spencer at imperial.ac.uk
Alex Thom	Imperial College, U.K.	a.thom at imperial.ac.uk
John Trail	Cambridge University, U.K.	jrt32 at cam.ac.uk
Mike Towler	Cambridge University/UCL, U.K.	mdt26 at cam.ac.uk
Cyrus Umrigar	Cornell University, U.S.A.	cyrusumrigar at gmail.com
Lucas Wagner	University of Illinois, U.S.A.	lkwagner at illinois.edu
Ching-Ming Wei	Academia Sinica, Taiwan	cmw at phys.sinica.edu.tw

FAMILY MEMBERS Ioana Campean, Maria Misquitta, Mark Misquitta
Samantha Keil, Saska Towler, Sandra Korth, David Korth

2 FLIGHTS AND TRANSPORT

This section gives details on how to get to the Institute for people flying into Galileo Galilei Airport, Pisa. It is also possible to fly to Florence which is only slightly further away - though flights to this airport are limited. In principle one could also fly to other airports such as Perugia, Bologna, Ancona, Parma, Milano, Verona, Genova or Roma but you should count on a train ride of up to four or five hours to get to the Institute (we can arrange this for you). A list of airlines flying to Pisa from destinations within Europe is given on the TTI web page (see "Flying to Italy" in the left-hand column). Americans should note that Delta Airlines now operate a direct service to Pisa from New York. Further details about transport, including how to drive to the Institute, are also given on the TTI web site.

Participants should aim to arrive at Pisa airport on Saturday 28th July (Cambridge people on Friday 27th). If this is not possible (e.g. if flights from your country are irregular) then we recommend having a brief holiday in Florence or similar before coming to TTI (or you could always volunteer to arrive early and help with the vast amount of back-breaking labour required to set up the conference!). If you really need to arrive early this can be arranged - contact us. Late departures are not possible however because of the summer school taking place immediately after the workshop - again, let us know if this affects you.

How to get to TTI from Pisa airport on Saturday 28th July:

Go to Pisa Centrale train station - either by taxi (c. 8 EUR) in five minutes from the airport (preferable) or by a short train ride from Pisa Aeroporto station (which you get to by walking out of one end of the airport concourse - turn left as you walk into the main hall). There is probably also a bus service, though I have never looked into this. From Pisa Centrale you then need to get a train to Barga-Gallicano. This is an isolated station north of the city of Lucca somewhere along a branch line going up the valley of the river Serchio into the mountains (see the map on the TTI web site). Depending on the train time, you may need to change at Lucca to get the train north - the train will usually be flagged as going to “Aulla”, “Aulla-Lunigiana”, “Minucciano”, “Piazza al Serchio” or “Fivizzano”.

The train in question is a little unimportant train, and only tickets for big important trains tend to be available on the internet. It is easy to buy tickets in the station ticket hall, either from a human (“Uno a Barga-Gallicano. Solo andata.”) or from one of the many automatic machines, which have instructions in English. On all Italian train journeys you are supposed to validate your ticket by getting it stamped by one of the various yellow machines attached to the station wall (insert the ticket into the slot and wait for it to click) or you may have to pay a fine. Note that Italian trains are very – even absurdly – cheap by international standards, particularly British ones. The ticket should cost around 4 to 6 Euros.

At Barga-Gallicano station you should find a TTI representative who will meet each Saturday train as required and take new arrivals to the Institute. If no-one is there you can wait in the station café - do call if you have to wait more than five or ten minutes. Clearly we need to know in advance the time of the train on which you intend to arrive. The timetable is linked from the TTI web site, but all Saturday train times are in fact given in the table below. Note that the last train from Pisa is around 20:50 so it would be a good idea to arrive earlier in the day if possible (particularly if you want to enjoy the welcome buffet dinner).

In emergencies it is possible to get a taxi to Vallico Sotto from the station but in general this needs to be pre-booked - see the instructions on the web site (Barga Taxi : taxibarga@libero.it Tel. 340 1669279 or 348 8106112). If you are a non-Italian speaker who hasn't pre-booked and you need to talk to the guy (Massimo) on the phone you will find he doesn't speak English so just say (phonetic) “Taxi a Vallico Sotto da la stasjonay di Barga-Gallicano?” or similar down a phone at him - the trip should cost around 35 Euro. Note that “I don't speak Italian” is “Non parlo italiano.”

In case of problems contact Mike on his mobile phone - 3479172621 (additional emergency assistance may be available from Samantha Keil on 00 44 7979 554034, though be aware that she doesn't know where anything is and, if asked a practical question, she will likely have a massive blubbing attack, and you will hear the sound of shoes and saucepans being thrown at her husband, with exaggerated shrieks to the effect of ‘Why are these bloody people so incompetent. Why can't you deal with it?!?!?’). TTI has two direct phone lines (0583 761608 and 0583 1805441) which you should use as a last resort.

3 TRAIN TIMETABLES

See www.ferroviedellostato.it/homepage_en.html.

Saturday 28th July, Pisa Centrale to Barga-Gallicano stations

THIS IS LAST YEAR'S TIMETABLE. IT WILL BE REPLACED BY THE 2012 VERSION WHEN IT BECOMES AVAILABLE (USUALLY IN EARLY JUNE)

6 CONFERENCE VEHICLES

37 people, 45 seats

OFFICIAL VEHICLES

6-seater Fiat Multipla - driver: ??
17-seater bus - driver: Mike Towler
7-seater rental car - driver: Pablo Lopez Rios
5-seater rental car - driver: Ryo Maezono

PRIVATE VEHICLES

5 seater Fiat Punto - driver: Mariapia Marchi
5 seater car - driver: Dario Bressanini

OTHER NON-OFFICIAL VEHICLES WHICH MAY BE PRESENT FOR PART OF THE WEEK:

5 seater car - driver Dario Alfe

SPARE DRIVERS FOR EMERGENCIES

TBC

7 THINGS TO BRING WITH YOU

- The overheads for your talk if you intend to give one - see later section for supported formats.
- Your laptop, if you wish (though this is completely not necessary, as we have large numbers of them - see note in Technical Equipment section).
- Summer hiking gear such as boots, socks, little rucsacs, sunhats etc.
- Italian plug converters if you want to plug anything in (we have some spare but donations of these are gratefully accepted). Our sockets mostly have two round pins (with an optional third one between them). There are two types of thin prongs on European adaptors. You want the thinner of the two. Just to confuse things, there are also lots of totally incompatible English plug sockets into which English equipment can be plugged directly.
- Some Euros for spending in restaurants and shops. Please note that there is no easily accessible cash machine near the Institute, and although we might pass them from time to time on our afternoon trips, large numbers of people getting money out can cause considerable delays. There is a cash machine in Pisa airport to your right as you emerge into the arrivals hall (a cash machine has now been installed in Fabbriche di Vallico a few kilometres away - this is now much less flaky than when it was first installed in 2007 but relying upon it to actually give you money would not be sensible.).

- People who intend to visit caves or canyons should bring some clothes and old shoes that you don't mind getting wet and a head torch (though we have supplies of torches if necessary).
- Climbing equipment (harness, helmet plus via ferrata gear if you have them) if you intend to take part in activities where this will be needed. We have limited supplies which are not enough to go round.
- Light sleeping bag and a torch (if you intend to sleep in the Bedouin tent).
- Hay fever tablets, if you don't like living in the countryside.
- A musical instrument, if you can play a portable one. See Section 15.
- Sunscreen
- A towel
- Swimming costume (if you wish to go swimming).

In the traditions of earlier workshops, you might also optionally like to bring

- A nice bottle of wine (or whatever passes for it in your country).
- An interesting thing

8 CONFERENCE SCHEDULE

This section contains the schedule for the conference, including a list of talks. The number of talks per day is deliberately small to allow time for thinking, discussion and deliberation. In principle there could be evening discussion sessions if required. If you do not wish to give a talk, or if you wish to give a shorter/longer talk than suggested, please ask. All excursions and activities are, of course, optional - and you may elect simply to relax at the Institute in the afternoons, or to make up your own activities. I have to book restaurants well in advance for such large groups so please make it known as soon as you can if you do not wish to attend particular meals.

Friday 27th July

EARLY ARRIVALS

Saturday 28th July

ARRIVALS

Excursion for early arrivals (total walking time 6 hours, total travel time 2.5 hrs). You will need to arrive at TTI on Fri 27th to take part in this expedition.

Assault on the "Via Ferrata Tordini-Galligani". "A climbing adventure in front of the north face of Pizzo d'Uccello" - the Matterhorn of the Apuan Alps. (p.120, red Tuscan North book).

Volunteers: TBC

Please take via ferrata kit, harness, and helmet (available in the climbing rack in the TTI church). Try them on and learn to use them the night before..

Leave TTI at 8:20 am to take the 09:14 train from Barga-Galliciano arriving at Equi Terme at 10:01. (There is an earlier train at 06:55 from BG, arr ET 07:39 - perhaps advisable to do this?)

Return trains are:

14:26 Equi Terme 15:13 Barga-Gallicano
16:49 Equi Terme 17:30 Barga-Gallicano
19:24 Equi Terme 20:09 Barga-Gallicano

Please try very hard to be on the 16:49 one. Please phone Mike if you're not.

Train cost: 3.10 EUR each way.

7pm : Welcome buffet dinner and drinks in the Institute garden.

Sunday 29th July

8.30am : Mike Towler (5 minutes)
- "Welcome to Tuscany"
8.35am : xx (50 minutes)
- "TBC"
9.30am : xx (50 minutes)
- "TBC"
10.30am : Benoit Braida (50 minutes)
- "Coupling valence bond theory with quantum Monte Carlo"
11:30am : xx (25 minutes)
- "TBC"

12.30pm : CHURCH (if you want)

POSSIBLE EXCURSIONS:

Trip to Alto Matanna. Numerous spectacular walks of varying difficulty.
See the Versilia coast, Elba, Corsica and sometimes even France from
the easily accessible summits of some of the more beautiful scenery in the
Apuan Alps. Bring one of the Institute's antique telescopes to watch the
more courageous of you scale the 500 foot cylindrical barrel of Monte Procinto.
Followed by drinks and dinner in 19th Century Alpine hotel.
- Balloon station walk (short and easy)
- Monte Matanna walk (medium) possible extended to Monte Nona.
- Monte Procinto climb (strenuous)
- Monte Croce circular walk from Palagnana (strenuous)
- Grotta all'Onda walk (Neanderthal cave) (strenuous)
DINNER : Matanna (BOOKED FOR ?? - 0584 776005)

Monday 30th July

8.30am : Matthew Foulkes (25 minutes)
- "Density matrix full-configuration interaction QMC"
9.00 am: xx (50 minutes)
- "TBC"
10.00am : Dario Bressanini (25 minutes)
- "TBC"
10:30am : Neil Drummond (50 minutes)
- "Quantum Monte Carlo calculations of the Fermi liquid parameters
of the 2D homogeneous electron gas"
11:30am : Andrea Droghetti (25 minutes)
"First principle studies of spin-crossover molecules"

POSSIBLE EXCURSIONS:

- Walk Matanna to Monte Forato (rock arch) to Fornovolasco - new ferrata route
Tana che urla cave
- Walk Palagnana-Monte Croce-Fornovolasco
- Grotta del Vento tourist cave
- Fornovolasco church and flood frescoes
- Independent cave-hunting (ask Mike)
- Swimming at Barga
- Staying in the monastery

DINNER : New Eremo di Calomini (BOOKED FOR ?? - 0583 767041)

Tuesday 31st July

-
- 8.30am : xx (50 minutes)
- "TBC"
 - 9.30am : Mauro Causa (50 minutes)
- "QMC experiences in solid-state and surface chemistry"
 - 10.30am : xx (50 minutes)
- "TBC"
 - 11.30am : James Spencer (25 minutes)
- "TBC"
- "TBC"

A DAY IN THE VILLAGE

- Relaxing, sunbathing, reading, studying, discussing

POSSIBLE EXCURSIONS:

- Circular walk from Vallico via San Luigi and Pian di Lago to the Trassilico fortress and back via the landslide.
- Turrite di San Rocco canyon walk
- Independent cave-hunting (ask Mike)
- Boating on the Turrite Cava lake (+ Buca del Lago della Turrite Cava)

DINNER : Da Sandra (BOOKED FOR ?? - 0583 761712)

Wednesday 1st August

-
- 8.30am : xx (50 minutes)
- "TBC"
 - 9.30am : Mariapia Marchi (50 minutes)
- "TBC"
 - 10.30am : xx (50 minutes)
- "TBC"
 - 11.30am : xx (25 minutes)
- "TBC"

POSSIBLE EXCURSIONS:

- Monte Sumbra
- Coreglia di Antelminelli and Buca delle Fate
- Swimming and shopping in Bagni di Lucca
- Staying in the monastery

DINNER : Il Laghetto (BOOKED FOR ?? - 0583 75798)

Thursday 2nd August

-
- 8.30am : xx (50 minutes)
- "TBC"
 - 9.30am : xx (50 minutes)

- "TBC"
- 10.30am : xx (50 minutes)
- "TBC"
- 11.30am : Bartomeu Monserrat-Sanchez (25 minutes)
- "Phonon wavefunctions and electron-phonon interactions in semiconductors"
- 12.00am : Ryo Maezono (25 minutes)
- "GPGPU acceleration of CASINO blip routine"

A DAY IN THE VILLAGE

- Relaxing, sunbathing, reading, studying, discussing
 - Metal detecting
 - The Vallico Sotto Game
 - Abseiling to the Buca della Fate di Vallico di Sotto
 - Football match - Vallico Sotto against the world/Vallico Sotto contro il mondo
- DINNER : Provided by Federico and friends at Vallico Sotto (BOOKED FOR ??)

Friday 3rd August

-
- 8:30am : xx (50 minutes)
 - "??"
 - 9.30am : xx (50 minutes)
 - "??"
 - 10.30am : xx (50 minutes)
 - "??"
 - 11.30am : Pascal Bugnion (25 minutes)
 - "The Geminal-Jastrow wave function in bulk materials"
 - 12.00am : xx (25 minutes)
 - "??"

POSSIBLE EXCURSIONS:

- Lucca
 - A surprise excursion not organized by Mike (suggestions please)
 - Staying in the monastery
- DINNER: Canapale, Vallico Sopra (BOOKED FOR ??)

Saturday 4th August

DEPARTURES

POSSIBLE EXCURSIONS FOR THOSE WHO ARE NOT LEAVING IMMEDIATELY.

Extra unassigned activities which can be easily planned:

- Orrido di Botri
- Buffardello park
- Random cave hunting trips following new cave maps acquired this year (e.g. Campolemisi, Fabbriche di Vallico, Antro della Paura, Motrone)
- Lucca Villas
- Pietrasanta
- Vinci (Leonardo's birthplace)
- Walk from Collodi to Pescia
- Local mountain trips (Pania della croce etc..)
- Marble quarries
- Beach trips to e.g. Sestri Levante, Portofino, Cinque Terre

9 TTI TECHNICAL EQUIPMENT

There are various Sony Vaio and four Acer Ferrari 4005 laptops in the Institute available for public use, almost all in dual-boot configurations running OpenSuse Linux (though with some Ubuntu) and Windows Vista or 7.

All connections are made through a standard wireless network. If you wish to bring your own laptop then it therefore needs to be wireless-enabled if you wish to log into the network (for older machines we have three spare wireless network cards that you can plug into your laptop PC card slot). The Institute SSID is 'TTI' and the network is completely unencrypted due to the total absence of hackers, or indeed computers, in remote mountain villages. Since June 2009, TTI is hooked up to the local 2 Mb/s wireless broadband network.

Apart from computers and networking devices, we also have the following equipment available:

- Big HP B/W laser printer (on a wireless print server)
- Canon Pixma ip4000 colour inkjet printer
- Hi-Ti Transphotable and Sony photo printers for instant printing of your photographs (you can plug in your camera directly - no need to go through a laptop - accepts all memory card formats that I am aware of).
- Epson Perfection 4990 scanner
- A3 laminator
- Guillotine.
- Finepix F455 digital camera
- Four memory sticks
- A supply of writeable CD-Rs, CD-RWs and DVD-Rs.
- The usual stationery and staples etc..

There are also a very large number of scientific and technical books which may be borrowed (top floor of the main building, and in the various bookshelves in the church).

Please note that there is also a new pigeon-hole bookcase intended for printouts of 'the literature'. This has currently been set up to include all the relevant papers for "21st-century directions in de Broglie-Bohm theory and beyond" - a huge conference we ran last year, but it may be refilled with anything you like. You are welcome to borrow these papers, but please put them back in exactly the same place you got them from as they are all carefully filed..

10 INTERNET USE

TTI laptops are mainly black/grey Sony Vaivos with a few red Acer Ferraris (note the difference in power supplies - the ones for the Ferraris have yellow ends, the Sony machines have black ones). Almost all are in dual boot configurations with some version of OpenSuse (some Ubuntu) Linux and Windows Vista/7 - after turning them on you should choose which OS you want. All will boot into Linux after some time by default unless you say otherwise. We essentially never use Windows here so the setup on the Windows partitions will be minimal if it has been done at all.

Since June 2009 the monastery's local network connects to the outside world through a 2Mb/s wireless broadband network (having previously been on dialup!). All local machines have static IP addresses 192.168.1.2x (where 2x is 20 plus the number of the machine - a red plastic label saying e.g. tti_laptop9 implies 192.168.1.29) so they can all talk to each other via ssh or ftp etc. With appropriate software all the laptops can be run as a parallel supercomputer should anyone need to do intensive calculations.

Other network details for administrators: IP 192.168.1.xx (static xx=10-99, DHCP assigned numbers from xx=102-200), Gateway 192.168.1.1, Primary DNS 62.94.0.41, Secondary DNS 212.216.112.112.. The router has a (password protected) web page at 192.168.1.2. Other equipment attached to the network: a VoIP phone (192.168.1.98), an internet radio (192.168.1.99), a wireless print server (192.168.1.101), and possibly the NEC projector on DHCP. Do not assign your own static IP number on personal hardware without consulting MDT/PLR.

Please be mindful of the needs of other users of the network. Although we have broadband, it is hardly a superfast connection, and downloading Gb of files to patch your machine or whatever is discouraged.

Note also that there is network coverage only in the main TTI building and not in any of the other houses we use for accommodation (Doctor's House, Casa Franca, Casa Gianpiero, Casa Luciana, Casa Anna Maria, and most definitely not in the Luxury Bedouin Tent).

11 PRESENTATION EQUIPMENT

The church is equipped with a good quality NEC MT1075 projector and an auxiliary Toshiba DPD TDP-T250U projector with DVI and regular RGB cabling . There is a giant 16' by 12' main screen, a 7'8 x 5'9 electric auxiliary screen, an Avervision document camera, a dual projection stand, a laptop, a DVD player with decent speakers, and various wireless control devices. There is a giant blackboard in the church and a smaller one in the main corridor stolen from the TCM Seminar room in the Cavendish Laboratory. There are two blackboards outside, and a portable one which can be taken on excursions if you wish to debate physics in restaurants or up mountains.

The NEC projector is wireless capable, so you can beam your talk from your laptop straight to it from anywhere in the room, as well as with old-fashioned direct connection (technical specs on the TTI website). The Institute laptops - each equipped with some Linux distribution (Suse Linux 11.0 onwards, occasionally Ubuntu) and Windows Vista/7 - will of course also take CDs and memory sticks and have the usual software such as Acroread and Powerpoint. On balance it is probably best to bring your talk on a CD or USB device or email it to MDT beforehand and he will ensure that it is on the relevant machine ready for your talk.

The Avervision document camera is a sort of cool overhead projector. It will display any printed document, photo, slides, X-ray film or 3D object straight through the projector, so basically you can dissect a frog live on the wall. There is a Victorian microscope with an attachment that allows it to be connected to the Avervision, so biological people can project the microworld on the big screen. Although we have a table with a white square painted on it, non-electronic talks are probably better on white pieces of paper rather than on transparencies..

12 EXCURSIONS AND ACTIVITIES

The various excursions and activities are divided into categories according to the physical effort involved. As there will be around 40 people at the conference, it is envisaged that each day the group will split into two or more subgroups, with the hot young muscular virile people doing the strenuous excursions, and the lazy, old and unfit doing more relaxed activities. Although we have incorporated suggested activities into the programme above, everyone is welcome to consider the following list and also to consult the various guidebooks in the TTI library in order to suggest alternative activities.

12.1 Very strenuous activities

- Climb the peak of Pizzo d'Uccello. Requires early start with no other activities (e.g. day before conference). See www.tcm.phy.cam.ac.uk/~mdt26/tti2/photos/pizzo_ducello.jpg. Enough said. They don't call it the 'Matterhorn of the Apuan Alps' for nothing.
- The ascent of Monte Procinto. This is a huge cylindrical rock tower with a belt of trees around its middle from which rise 500-foot walls, overhanging on every side. Michelangelo had the idea of carving it into a gigantic sculpture along the lines of Mount Rushmore but never got round to it. You can see the mountain here: www.vallico.net/procinto.jpg. Yes - the walls are more or less vertical, but there is a *via ferrata* to clip yourself onto. Instruction, assistance, and the necessary equipment can usually be supplied - but we only have about eight harnesses so bring your own if you have one!
- Reach the high peak of Pania della Croce from Piglionico (described as 'The finest peak in the whole of Italy' in *Below the Snow Line* - one of the 19th century books in the TTI Antiquarian Library). Also features in Dante's *Divine Comedy*. This defeated some of TTI finest mountaineers for several years before they finally succeeded in 2007 (note - it isn't that hard if you move quickly).
- Find the spectacular natural rock bridge of Monte Forato (under which someone once flew a bi-plane). Start from Fornovolasco (lots of up) or from Matanna (much easier) or even have two groups that meet in the middle and exchange car keys. New for 2009: there is a fun *via ferrata* traverse on the way to the arch from Matanna, and we will do a new route via Foce di Valli.
- Find the Neanderthal cave (Grotte all'Onda) down the slope from the balloon station near Matanna. *"This vast grotto stretches 40 x 60 meters and it originally hosted numerous internal tunnels, which are obstructed today. Its enormous cavity offers important evidence that suggests the frequency with which people entered the grotto, from pre-historical times to more recent periods. The first people to use the cave were Neanderthals; they hunted throughout the surrounding area and probably used it to hoard their tools and weapons, together with the bones of the animals they cooked. Hunters from the Superior Palaeolithic period (Homo Sapiens) lived in the more external part of the grotto where they set up a giant hearth. Later, Neolithic farmers and shepherds planted their huts in the shelter of the grotto's vast vault, carrying out their daily activities there during many seasons. This cave was also used during the Neolithic period (the Bronze Age), during which new models were developed for decorating ceramic. During this period, new raw materials, imported from distant locations, were adopted to make special equipment. From the post-Bronze Age until recent times, the grotto was not continuously frequented."*
- The new Geoscopio web site (www.vallico.net/tti/tti_mountaineering.html) shows precise locations of all of the thousands of caves in Tuscany (even the crap ones) together with a brief technical description and a plan of the cave. Interesting little expeditions may be made that have the aim of finding the entrance to particular caves, as well as exploring them. This is of course the most fun that a boy can have. The Apuan Alps have more caves than you can possibly imagine, so this will still be a viable activity in 2050. In particular, ask Mike about the untried Campolemisi, Fabbriche di Vallico, Motrone, and Antro della Paura expeditions.
- Explore the canyon of the Turrite di San Rocco river. This starts from the fork in the river upstream from Fabbriche di Vallico before you get to Gragliana. Take the left-hand fork. The aim is to go all the way through it to take coffee at the cafe near the Chiesa di San Rocco in Turrite. Be prepared to get wet - you basically can't avoid it. There are various natural swimming pools in there. Once reaching the village where the cafe is (there is also a children's playground and a nice river) you will have to bribe a local to give your driver a lift back via Focchia to your van. Or perhaps all your drivers drove a convoy out there beforehand, left most of the vehicles, and returned to the start of the canyon in a single car - use your initiative here.
- Morning workout. Run from the Institute each morning at 6am to the spectacular summit of Monte Palodina in order to tone up your thigh muscles and pep yourself up in preparation for the morning's talks. Mad people only.

- Complete the Cinque Terre coastal walk, a four-hour excursion through some of Italy's most spectacular scenery, or a similar walk near the famous seaside haven of Portofino.
- *Orrido di Botri* canyon walk. The Orrido is a giant canyon created by the Pelago river in the Apennines (about an hour's drive from the Institute) with deep steep walls as high as 200 metres and in some places only a few metres apart. This is a geologists' and naturalists' paradise. It can only be visited with helmets and suitable clothing you don't mind getting wet. There are some nice long walks in the country above the canyon (watch out for marmites and Royal Eagles - this is one of your best chances to contribute to the TTI Wildlife Photography expedition).
- There are of course any number of spectacular high mountain expeditions in the Apuan Alps and the Institute has a library of guidebooks which you can browse through. Let me know if you want to try anything else (that will fit in the clearly limited amount of time). There is also the TTI Antiquarian library (Mountaineering section) to inspire you.

12.2 Quite strenuous activities

- Go to Alto Matanna at the end of the Turrtecava valley and visit the beautiful nineteenth-century hunting lodge that was once the destination for travellers in Rosetta the Balloon on her aerostatic cableway. See the old balloon station at Foce del Pallone and the extraordinary view. On clear days you can see Elba - 100 miles to the South - and sometimes the even more distant Corsica and the French Alps. Come back over the top of Monte Matanna and descend back to the lodge. Take one of the Institute's antique telescopes with you.
- From the Matanna hotel, climb up to the cross on the adjacent ridge for a spectacular view of Monte Procinto, Stazzema and the Apuan Alps. From there you can climb Monte Matanna the other way around, or visit the donkey and his little horse friends who live on the top of Monte Nona. Or you could go on a longer walk below the Giant West Wall of Nona, threading past Monte Procinto, and round the back of Monte Nona which will take several hours. Finish up the day with a fabulous dinner in the Matanna hotel.
- Take part in the latest expedition to the ancient cave known as the *Tana di Cascaltendine* which is the subject of Pietro Magri's 1880 book *An expedition to Mount Gragno and the Cave of Cascaltendine* as translated by Mike and available on the TTI web site (click the Local History Projects link). The 2007 summer school crew were able to photograph the result of the following quote : *'Before coming down from the cavern we used a chisel to inscribe our initials and the year 1880 on both walls of the passage near the entrance.'* This was done in the "Palace of Ismeno" which was the name Magri's group gave to an extensive cave whose entrance is a 6 foot hole about forty feet up a cliff - the full story is on the News from the Towler Institute blog. It is also known that the cave continues for a kilometre beyond where we have penetrated before and this remains to be explored (note that in summer 2007, Mike and Evans went up the big wall in the final chamber with the dangling rope - a place many TTI visitors have visited before - with somewhat amusing consequences - see the blog story 'Bronze Hermaphrodites and the Fat Boy Filter'). Expedition to be followed by cold beers and refreshments in the lovely village of Cardoso, or a circuit of Monte Penna hunting for the lost Cave of the Fairies..
- Visit the Selva del Buffardello adventure park:

www.selvadelbuffardello.it/index.php?lang=eng

I quote from their web site: *"Among the centuries-old fir trees some acrobatic forest paths, open to everybody, have been created and their aim is to show the wood from a different and adventurous point of view: hanging in the air. It is a challenge for children, youth and adults, who can test their ability with suspension bridges, swinging beams, vertical nets, ropes and obstacles, finding again their lost adventurous spirit. The Adventure Park 'Selva del Buffardello' in San Romano in Garfagnana (locality Pra' di Lago) is a real novelty in the Appennino Tosco Emiliano. An old wood of two hectares and a half in the heart of Garfagnana, near the natural 'Parco dell'Orecchiella', with a wonderful view on the Alpi Apuane and on the Fortezza delle Verrucole (old castle). The park entrance is free if you don't practise in the adventure paths."* We have never tried this, but it looks like great fun.

- TTI management has discovered that there is a secret underground tunnel in Vallico which starts from the Doctor's House next door to the Institute (a former barracks) and which goes up to the Rocchetta above the village (the site of an old castle on the summit of a little hill, where we now pitch the Bedouin Tent). This was used in mediaeval times for escape from the frequent warfare so common in these parts. The supposed entrance to the tunnel was bricked up (we think) in the 1930s - there are a couple of elderly men in the village who vaguely remember it. This summer we hope to unblock the entrance and explore. We also wish to find the upper entrance, so if you know anyone who has a ground-penetrating radar set we can borrow, let us know. This will probably be one of the next thrilling tales in 'News from the Towler Institute'.
- Explore the Vallico Sotto mule trail and the spectacular forgotten waterfall of Cascata Pendolina - one of the highest in Italy. Vallico was only connected by road to the outside world in the 1960s - before then people went up and down the *mule trail*. This has now been forgotten and is a little overgrown (though less so following TTI clearing activities) but is still very beautiful. Once we reach the bottom of the valley we will head over the river to the site of the Cascata Pendolina where we will take lunch. On the way back the bravest people will try to ascend the *Canyon of the Pili* carved by the Rio Selvano (you will get wet!). EDIT: and they will fail - I have recently discovered the only way you can feasibly do this is to *descend* from the top. Apparently this canyon is quite famous - the Apians group from Castelnuovo organize tours through it. One of these days I will have to attach myself to one of these expeditions to learn how to do it. Apparently there are 12 major waterfalls to descend - photos and rough maps are linked from the Mountaineering page of the web site.
- Explore *Buca della Freddana* cave near the mule trail from Vallico Sopra to San Luigi. This was (re-)discovered by Mike in Easter 2007 following conflicting and confusing advice from several local old ladies who remembered its existence from 40 years ago. He has also found the upper entrance of the same cave on the summit of Monte Penna - the two are apparently connected by a 1 kilometre passage. The old ladies have advised us not to go inside because of the evil monsters and dark pits that lurk within, but then again, they always say that. Dare you explore?
- Five a side-football (a new fenced pitch was constructed in Vallico a couple of years ago) or regular football (on the local full-sized pitch).
- Rock climbing or low-level bouldering - the Institute should have some ropes and climbing equipment. I've read that there is good climbing near the Trombacco damn in the next door Fornovalasco valley - ask MDT for more details. Don't forget to bring climbing boots and a harness that fits if you want to do this seriously (we have a rope you can borrow).
- Pietro Magri in his 1880 book mentioned above states that there are two other caves in Monte Gragno besides the Tana di Cascaltendine. Today no-one seems to know where they are. Having found the Buca della Freddana, Mike has narrowed down the lost "Cave of the Fairies" to a relatively small area. Can you find it?
- Traverse from Santa Luigi via Monte Palodina and the cliffs of Monte Gragno past the giant karst depression of Pian di Lago to the spectacular Rocca Estense fortress of Trassilico. Come back along the road past La Fornace.
- Explore the *Tana che urla* (the Cave that Screams!) - first explored and scientifically described by Vallisneri in 1726 - off the footpath to Foce di Petrosciano from Fornovalasco. This isn't a tourist cave suitable for your mum - so bring some appropriate clothes and torches. By the summer the Institute should have some proper speleological equipment to hand round. If you can read Italian, have a look at www.buffardello.it/attivita/pubblicazioni/di_alcune_grotte.pdf.
- Go on a beautiful walk over the highest stone railway bridge in Europe to the church in Sambuca.
- Go wild boar hunting.
- Learn to play local sport *palla elastica* (elastic ball) with the village youths.

- Use TTI's two inflatable boats to play on the Turrtecava lake - accompanying picnic recommended. Have races. Try to find the Buca del Lago della Turrte Cava (as you sail towards the dam, it is on the left just after the exit of the second road tunnel).
- Go kayaking on the Turrtecava. Bring your own canoe.
- Explore the ancient *Vasaio di Motrone* cave in the nearby village of Motrone (see www.apuane2007.it/italiano/vasaio/zona.vasaio.php).

12.3 Relaxed activities

- Visit the Pinocchio park, the Garzoni gardens, and the Collodi butterfly house in Collodi. See www.pinocchio.it/park.htm. From the website: *“Inaugurated in 1956, the Pinocchio Park is no ordinary theme park, but rather a precious masterpiece created by artists of great character working together. The literary itinerary, marked out by mosaics, buildings and sculptures set amidst the greenery, emerges from an inspired combination of art and nature. The path is winding, and the dense vegetation means that every stage on the route comes as an unexpected surprise, with the very plants and trees contributing to create the atmosphere and the episodes in the story of the Adventures of Pinocchio. The Park itself is the site of constantly renewed cultural activities that are always mindful of its roots: exhibitions of art and illustrations inspired by childrens literature and the Story of Pinocchio, puppet-making workshops, puppet and marionette shows and minstrels enliven the visit to the Park, depending on the season. ”*. For the gardens: *“The historic Garzoni Garden, one of the most beautiful in Italy, represents a felicitous synthesis between Renaissance geometry and the spectacular quality of the nascent Baroque. The garden is a work of art of rare equilibrium, where the greenery, the flights of steps the water plays and statues form a truly unique ensemble. It is an absolutely unforgettable experience to lose oneself amidst the wonders of this fantastic place: grottoes, theatres carved out of box hedges, statues representing mythological creatures, satyrs, female figures, greenhouses with peacocks, forests of bamboo. An ancient, and somewhat arch tradition considers the visit to be propitious for lovers, and not only on account of the leafy shade and the arbours that offer secluded spots for tender caresses, but also of the maze, a symbolic allusion to the path to follow together throughout life. As soon as we enter the garden we come upon delightful parterres, statues and two large circular pools. Proceeding we then reach two magnificent double ramps of steps featuring a complex hydraulic system that supplies the water plays. These steps lead to the three upper terraces. Beyond is the impressive water staircase, flanked by two female statues representing the eternal rivals Lucca and Florence. At the very top is the statue of Fame blowing into a shell, emerging from which a jet of water traces out a lofty arc. Leading off the main route through the garden are numerous side paths and avenues where we can discover its marvels among the fragrances of the different plants, the plays of light and shade of the vegetation, the intrigue of the mazes and the enchantment of the sculptures. The garden has recently been restored.”*
- The Opera Barga festival is usually on at the same time as the conference (25th July-8th August in 2009). Ask Mike in advance for tickets and reservations.
- Look in the latest issue of Lucca "Grapevine" magazine in English for local cultural activities and concerts etc..
- Play with the Institute's Victorian Scientific Instrument Collection.
- Spend the afternoon bathing in the outdoor hot pool at the ancient thermal baths of Bagni di Lucca (one of the most fashionable spots in Europe in Lord Byron's time - the Switzerland of Tuscany!). Followed by shopping, sightseeing and coffee in the town centre.
- Samantha has two other favourite open-air pools at Galliciano and Barga. These are like little beach resorts where one lazes about on deckchairs and has the occasional dip.
- Watch the night sky through the Institute's astronomical telescope.
- Visit the ancient city of Barga (www.barganews.com) for an afternoon's relaxed sightseeing, shopping and culture.

- Visit the beautiful city of Lucca.
- Visit Castelnuovo di Garfagnana, where you can find Andrea's (the 'Indiana Jones of the Garfagnana') famous Osteria, where all day you can sample fabulous local wines, cheeses and snacks.
- Follow in the footsteps of Michaelangelo, and visit some of the Apuan Alps famous marble quarries.
- Day trip to Florence.
- Drive to the next valley along from ours over a spectacular high mountain road where the eagles live. Visit the Grotta del Vento - the Cave of the Winds (www.grottadelvento.com). This is the most famous cave system in Tuscany and the visitor will enjoy a spectacular and bizarre landscape of caverns and lakes. Take a pullover as the temperature is a reliable 10 degrees the whole year round. Then head down the valley to visit the *Eremo di Calomini* - an ancient monastery built into a high steep cliff.
- Table football and drinking in Fabbriche di Vallico.
- Horse riding at La Fornace.
- Various mild short walks around the Institute.
- Digging the Institute garden and doing little DIY things like restoring the church or clearing paths (I say this merely in hope..).

12.4 Very relaxed activities

- TTI now has a high-definition video camera. Make a film of life at one of the world's best conferences.
- Budding archaeologists may use the TTI metal detector - bought following last year's spooky event when Evans and Mike were digging a hole in the ground for the satellite dish (I'm really not making this up): MIKE: Hey Evans, watch out for crucifixes when you're digging that hole. This used to be a monastery you know. EVANS (REACHING INTO THE HOLE) What, like this one? (HOLDS UP A THOUSAND YEAR OLD BRONZE CRUCIFIX FROM FIVE FEET DOWN).
- Spend all day in the TTI garden relaxing in one of the Institute's three hammocks, drinking wine, snoozing or reading one of the books from the TTI library.
- The Institute has a variety of board games, jigsaws, and similar entertainments together with a number of Victorian books with titles like 'What To Do On Cold Winter Evenings Given That We Haven't Invented Television Yet'.
- Debate physics with the help of the Institute blackboards.
- Listen to one of Mike's tedious lectures inspired by the contents of the TTI Antiquarian Library such as *Richard Burton and the Source of the Nile* (Burton the Victorian explorer and polymath, not the one out of *Where Eagles Dare*..) or *Up The Orinoco with Alexander von Humboldt*.
- Spa treatments in the Bagni di Lucca "Thermal resort".
- Mike is translating some chapters of a book on the history of Vallico Sotto. If he's finished it by the time you visit, then walk around the village looking at the buildings and places it describes.
- MDT has taken to writing stories about events at the Institute and publishing them on his blog at the local Barga News website. See www.barganews.com and the "News from the Towler Institute" blog (or go to the TTI web site www.vallico.net/tti/tti.html and click on the relevant link in the left-hand column). So far these are mainly about cave explorations and similar adventures. However, Mike doesn't have a monopoly on this. If you wish to contribute your literary efforts then please send your stories about your adventures in Italy to him, and they will be published on the blog.

12.5 General

- The Institute has a wildlife photography notice board. Prizes for the best entries, particularly if you can take a picture of one of the eagles that regular soar above Vallico or of the elusive *marmite*.
- The Towler Institute Exploration Society also has a photographic competition running - see the web site for details.
- Revitalize the economy of Vallico Sotto. It's barely 40 years since 450 people lived here. Now less than 100 do so. Just because modern lazy teenagers want to be fashion models smoking drugs in Milan rather than having a nice healthy outdoor life, the population of rural Italy has been denuded. Let's bring back the time when all the mountain terraces were in production, packs of nice mules helped carry things, teams of volunteers kept paths and bridges open, and everyone knew how to bake chestnut cakes. All serious suggestions gratefully received.

13 FOOD

In general breakfast will be taken in the Institute, and lunch in the little bar in Vallico Sotto run by the lovely Monica.

In the institute some basic food staples will be provided which participants should feel free to fight over but in general you might like to buy your own food in the village shop run by the lovely and friendly Adelina. However sadly you can't because it closed in late 2007 - much to the consternation of all she has now relocated to a big new shop down in the main valley in Pian di Coreglia. To replace her, there are two food shops in Fabbriche di Vallico - five minutes drive downhill, and a giant Leclerc supermarket in Gallicano (twenty-five minutes drive).

To find the Vallico Sotto bar for lunch, go down the tunnel underneath the Doctor's house (the big house opposite the TTI church front door). Then take any path downwards until you get to the Vallico main square - the bar is just underneath that.. You are strongly encouraged to take your lunch here, as normally it doesn't serve food and Monica is doing us a big favour by buying food and preparing it - so we need to make it worth her while . Note you can also get beers and coffees and so on here..

Note that people in local shops - or indeed anywhere round here - tend not to speak English, so learning some basic Italian food words before you come will help : *pane* = bread, *formaggio* = cheese, *prosciutto* = ham, *pomodori*=tomatoes, *birra* = beer, *vino* = wine, *caffè* = coffee, *latte* = milk, *grazie!* = thank you!.

You are of course welcome to make use of the Institute's cooking facilities whenever you want; in fact why not cook a lovely meal demonstrating the delicious cuisine of Kazakhstan, or wherever it is that you come from? There is a big downstairs kitchen in the main building with a total of 10 rings formerly run by a proper cook, and a small upstairs kitchen. The Institute even has its very own *Il Collegio Cookbook* written and published by former owner Leonie Whitton whose recipes you are encouraged to try. There are also two kitchens in the adjacent Doctor's house which will be rented for the duration of the conference, and one in the Casa Franca house.

On the first evening a simple buffet dinner will be provided. Later in the week the Institute's 16th Century pizza oven may be pressed into service. The rest of the time we will make use of the excellent local restaurants - these are mostly incredibly cheap. Given the large number of people staying at the Institute, people are encouraged to break up into at least two groups, although many of them - especially Da Sandra - are large enough to handle everyone. Unless told otherwise, Mike will simply assume that you will be coming to each evening meal and will make bookings accordingly (generally a few weeks in advance). these bookings can be changed but please give Mike plenty of notice.

Finally, if you are a vegetarian, you need to be aware that the locals will consider you to be slightly mad and will feel very sorry that you are unable to enjoy their passion for delicious animal products of all kinds. Don't worry about this. Following several years of TTI activities, they are now used to us bring-

ing curious foreigners to their restaurants and most are now able to supply vegetarian meals of some kind.

A FEW LOCAL RECOMMENDED RESTAURANTS

- Mulino Biologico (3280 707037, Fabbriche di Vallico)
- Da Sandra (0583 761289 on the road between Fabbriche di Vallico and Vallico Sotto).
- Il Canapale (0583 761829, Vallico Sopra)
- Al Laghetto (0583 75798, near the lake at the entrance to the Turrtecava valley)
- La Rondine (0583 761751 Fabbriche di Vallico, open Fri evening, plus all day Sat/Sun)
- Alto Matanna (0584 776005, Matanna)
- Ristorante Rita e Rinaldo (0583 357728, Focchia)

RESTAURANTS SLIGHTLY FURTHER AFIELD

- Circolo dei Forestieri, Bagni di Lucca
- Antica Trattoria dell'Eremita, Vergemoli
- Il Garfagnino, on the main road near Turrtecava.
- Quadrifoglio, on the main road near Calavorno.
- LOTS MORE - ASK

SPECIAL RESTAURANTS

- La Buca di Sant'Antonio, Lucca
- La Mora, Ponte a Moriano
- Butterfly, Lucca

See also the TTI Restaurant Guide page on the website.

14 CLEANING ROTA

Guests who have the misfortune to be members of the Cambridge University TCM Group or Imperial College and under the age of 40 are normally press-ganged into trying to keep the Institute clean:

Mike Towler - upstairs kitchen and corridor, upstairs bathroom, church
Bartomeu Monserrat-Sanchez - church, middle corridor, and front porch
James Sanchez - back garden, middle floor bathroom
Sam Azadi - downstairs living room , corridor and pantry, front garden
Pascal Bugnion - downstairs kitchen
John Trail - downstairs kitchen

Everyone else please try not to create too much mess for them.

15 TTI AMATEUR EVENING CONCERTS

I quote Professor Mitás :

PS. Suggestion. After the last year experience it seems that there was enough potential to organize small evening concerts just for us (amateur or professional). The violin is too difficult for me but I might practice recorder and if Andrea would accompany, some slower movements of Handel and Telemann sonatas might be doable. Others showed much greater talents, actually. I am sure Pablo could do some easier baroque (and other) guitar pieces, etc. The key is practicing in advance, at least a little bit.

The Institute has a high-quality antique violin (currently broken!), a modern electric violin, an electric piano, an acoustic guitar, a microphone and an amplifier. Please feel free to bring your own instruments.

16 CINEMA VALLICO

The requirements of modern science presentations means the Institute church is also the only cinema in the whole of the Apuan Alps - a fact that local people very much enjoy (since the opening presentation of *Cinema Paradiso* in August 2005). During the conference you are welcome to use the projectors and it is expected that movies will be shown on some evenings. The Institute has an extensive DVD library which you are welcome to browse. Feel free also to bring your own movies that you think we might enjoy.

17 NEWS FROM THE TOWLER INSTITUTE

MDT has taken to writing stories about events at the Institute and publishing them on his blog at the local Barga News website. See www.barganews.com and the "News from the Towler Institute" blog (or go to the TTI web site www.vallico.net/tti/tti.html and click on the relevant link in the left-hand column). So far these are mainly about cave explorations and similar adventures. However, Mike doesn't have a monopoly on this. If you wish to contribute your literary efforts then please send your stories about your adventures in Italy to him, and they will be published on the blog.

18 FOOTBALL MATCH: VALLICO SOTTO CONTRO IL MONDO

The thrusting young lads of Vallico Sotto have challenged the Rest of the World - i.e. you - to a game of 5-a-side football on the village pitch. This tradition - which we began a few years ago - attracts a large crowd and we always get absolutely caned (even when I have had Brazilians and Spanish people available). Can a small mountain village with less than a hundred inhabitants continue to defy the other 6 billion of us? If you think you can stop them, please volunteer.

VOLUNTEERS REQUIRED

Dario Alfe

No-one else Required.

19 SUMMER SCHOOL

Note that the conference will be followed by a QMC Summer School the following week, taught by Mike Towler, Neil Drummond, Pablo López Ríos and possibly others. Schedule available on the web site. Volunteers to help are absolutely welcome - particularly if you can drive.

20 HEALTH AND SAFETY

We should all recognise that climbing and mountaineering are activities with a danger of personal injury or death. Participants in these activities during their stay at TTI are asked to be aware of and accept these

risks and be responsible for their own actions.

Vallico Sotto is a mediaeval village built a thousand years ago on a steep slope with many steps, and the facilities for the disabled are thus either completely disastrous or non-existent. However don't let this put you off; if we have to carry your wheelchair up the hill with you in it, then this can be arranged.

TTI is a smoking venue and visitors may smoke as much as they like (ashtrays will be provided).

21 APPENDIX 1 : Talk abstracts

Some people like to provide abstracts for their talks. The ones I have received are gathered here.

NONE YET
