Digital Catapult selects four cleantech companies as ones to watch in 2022

Digital Catapult has selected four startups to work alongside giants of Indian industry to transform the future of net zero manufacturing and supply chains, as part of its Industrial Net Zero cohort for [FutureScope \(https://www.digicatapult.org.uk/news-and-insights/press-releases/post/futurescope-startup-scaleup-support-programme/\)](https://www.digicatapult.org.uk/news-and-insights/press-releases/post/futurescope-startup-scaleup-support-programme/), the new home for startup and scaleup acceleration.

In the first of its kind from Digital Catapult, the [Build UK – India](https://www.digicatapult.org.uk/how-we-can-help/live-opportunities/opportunity/build-uk-india-industrial-net-zero/) (<https://www.digicatapult.org.uk/how-we-can-help/live-opportunities/opportunity/build-uk-india-industrial-net-zero/>) programme has been designed to partner cutting-edge UK tech startups that are developing net zero solutions for industry, with leading Indian corporations including Tata Steel, Johnson Matthey and Godrej Aerospace.

The startups will work closely with technology and business experts from Digital Catapult, before receiving grant funding of up to £45,000 to build demonstrators in response to challenges set by the industrial partners.
